eaturing: Over 1000 Samples, 72:23 minutes Toland Sound Space '3D' Recordings

"As I am constantly on the look-out for new sounds for my sample library, I appreciate that some of these might be useful to other sample addicts. I buy sample collections myself and I found that most of the libraries on offer concentrate on 'classic' sounds, you know the '99 different ways of hitting an average snare drum, part one' kind, without taking modern chart trends into account.

On complaining about this to Matt at AMG, he pointed out that someone should put out a collection of vibrant, raw, dirty, weird and wonderful contemporary dance sounds, and he suggested why not release my own? I have a back catalogue full of strange and dodgy stuff since I very rarely use the same sample twice (it's that 'explorer' spirit), so I agreed.

Well here it is, only time will tell whether anyone else out there shares my taste for cheesy sounds, but I am looking forward to the day I listen to the radio and recognise samples from this CD on the current top ten!

Happy sampling!"

Well here it is - at last. The Pascal Gabriel Dance CD. We think you will find this CD an excellent resource if you're involved in dance music. You should, as we've basically raided one of the leading lights of dance music's personal sample library. Pascal's a writer, producer and remixer who's worked with such well-known names as S-Express, Bomb The Bass, EMF, Coldcut, Erasure, Jimmy Somerville, Claudia Brucken, and many more. It would be fair to say he knows a thing or two about dance music. When Pascal got into it I don't think he realised just how much stuff we were going to need to fill a CD, especially as we decided we were only going to use original samples. Aside from this CD, he hasn't got any library left. He's philosophical about it. He says it's good because it'll make him go out out a find a whole new batch of samples. I think that could be the cue for Volume Two. - Matthew, AMG

#### Track 1

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | oximately 2                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## **Technical Information**

## Audio CD

Tracks can be selected as usual via your CD track select buttons. In addition most sounds within tracks have been allocated their own Index point so they may also be directly accessed if your CD player features an index select button. All samples have been level matched for easy sampling and a test tone is also featured. Some of the samples featured are not of the highest audio quality, but this is a dance samples CD and this rawness is an essential ingredient in any dance mix.

### **Data Section**

This feature allows you to load fully mapped and sampled banks into your \$1000/1100 via digital data transfer. Simply set your \$1000 to accept data via it's optional digital interface and then play the appropriate track on the CD - Bingo! System requirements: Akai \$1000/1100, Akai IB-104 Interface & any CD player featuring digital I/O.

## RSS - Roland Sound Space Processing

This is a new process developed by Roland that allows sounds to be positioned and moved within a 3D soundfield by using loads of clever tricks involving all kinds of really technical stuff. You must sample in stereo to retain the 3D effect. The effect cannot be heard using headphones. Switch polarity to reverse the effect. Results can be a little unpredictable at the moment but sometimes the effect is quite sensational. This may be the future.

## General

This CD was compiled from original DAT tapes using a Mac IIcx with over 1 gig of HD space required. It was PQ encoded at Chop 'em out and manufactured by PDO. We are always interested to hear your comments - please fax/write to AMG.

## **Production Credits**

All sounds from the library of Pascal Gabriel
Digitally Edited at DubMaster Studios
Digitally Compiled & Mastered by Lee Groves
Design by Matthew Wilkinson

Thanks are also due to the DubMaster Crew, Simon Wood and Philip Hoegger, and George Thorn & Roland (UK) for the use of the Roland Sound Space 'RSS' Processing System who have also made significant contributions towards the production of this CD. Ekilpsed? - Love conquers all.

We have made every effort to ensure that this CD contains no material that is subject to any copyrights. Therefore the legitimate purchaser of this CD should be able to use any sample from this CD without fear of infringing copyright. If you find any samples you believe are subject to copyright please notify AMG. We suggest you contact AMG if you are going to use any samples on a commercial project to ensure that no copyrights have been reported on the samples you are using.

Made in the UK

THEME FROM S. EVERESS C.F.

Here's a small selection of what the press have had to say:

"...house gold dust breaks new ground" - Music Technology, Dec '91

"...off-beat, quite distinctive, and highly usable.
Better still you almost certainly won't have heard
them before...useful and memorable...a
revelation...uniformly excellent...the basis for many
a hit." - Sound On Sound, Jan, 92.
